EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Ms. Jessica Sinnott, applicants' attorney, on July 27, 2006.

The application has been amended as follows:

On pg. 13 Ins. 3-18 in the applicants' specification set forth in the applicants' amendment filed on June 30, 2006, delete:

--, and

(b) recovering the titanium dioxide nanopowder having a surface area in the range of about 30 to about 300 m²/g and wherein about 50 volume percent of the particles have a diameter of about 80 nm or less and wherein about 90 volume percent of the particles have a diameter of about 100 nm or less--.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

While U. S. Patent 5,201,949 discloses a substantially similar process for making titanium dioxide particles by the oxidation of titanium tetrachloride in what appears to be the same flame reactor (please see col. 7 lines 1-7) at a temperature that is at least 800 °C and a pressure that is at least about 10 psi (please see col. 2 lines 17-21), in the presence of: (i) water vapor in an amount ranging from 50 to 100,000 ppm based on the

Art Unit: 1754

weight of titanium dioxide under production (please see col. 2 lines 22-25); (ii) a spacing gas (i. e. the applicants' diluent gas) in an amount that ranges from 1 to 100 mole percent based on the titanium tetrachloride and oxygen (please see col. 5 lines 31-38), and (iii) a nucleant consisting essentially of a cesium substance in an amount ranging from 8 to 2,000 ppm based on the weight of titanium dioxide under production, the applicants' independent claim limits the surface area of the titanium dioxide particles to range from 30 to 300 m²/g whereas Table 1 set forth in col. 7 in U. S. Patent 5,201,949 reports surface areas that range from 6.5 to 6.9 m²/g. All of the claim limitations must be taught or suggested by the prior art to establish a *prima facie* case of obviousness of a claimed invention: please see the discussion of the *In re Royka* 490 F.2d 981, 180 USPQ 580 (CCPA 1974) court decision set forth in section 2143.03 in the MPEP 8th Ed., Rev. 3, Aug. 2005.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Timothy C. Vanoy whose telephone number is 571-272-8158. The examiner can normally be reached on Mon-Fri 8-4:30.
